

A photograph of a rooftop HVAC unit. The unit is a large, rectangular concrete structure with a flat top. The base of the unit is painted red, while the upper portion is a light-colored, weathered concrete. There are several large, dark, rectangular openings in the side of the unit. A white flexible duct is connected to the left side of the unit. To the right of the unit, there is a white outdoor condenser coil with a fan. The unit is situated on a red-painted rooftop surface. In the background, a cityscape with various buildings and a body of water is visible under a blue sky with scattered clouds.

A close-up photograph of a concrete bridge pier. The pier is heavily damaged, with a large, jagged crack running vertically down its face. The concrete is crumbling and exposed aggregate is visible. A white, curved object, possibly a piece of tape or a repair material, is visible on the left side of the pier. The background shows a cityscape with various buildings and a road.

A photograph showing a ship's deck with a red-painted surface and a metal railing. In the background, a large industrial facility with a prominent blue smokestack is visible under a cloudy sky.

A close-up photograph of a metal plate, likely aluminum, showing a vertical white strip (possibly a seal or tape) running down the center. The plate is secured with several circular rivets or bolts. The surface of the metal plate shows signs of wear, including small pits and discoloration. A small, dark, triangular object is visible at the top center of the plate.
